Syngene International takes top honors at CMO Leadership Awards 2022 for contract manufacturing

Current customers rate company top in all categories: quality, *expertise*, *compatibility*, *capabilities*, *reliability* and *service*

Bangalore, 9th March 2022: Syngene International, an integrated research, development, and manufacturing services company, was ranked top in the CMO Leadership Awards 2022 in all the six core award categories - quality, expertise, compatibility, capabilities, reliability, and service. The awards are based on customer feedback about the performance of the company's contract manufacturing practices based on projects delivered in the last 18 months.

Jonathan Hunt, Managing Director and Chief Executive Officer, Syngene International said, *"Winning the CMO Leadership Awards 2022 across all six categories is a huge honor for the company. This outstanding achievement demonstrates Syngene's strong commitment to meet client expectations and reflects our collaborative approach and determination to deliver quality products that have a positive impact on millions of patients and consumers around the world."*

For the 11th edition of the CMO Leadership Awards 2022, Life Science Leader and Outsourced Pharma partnered with research firm Industry Standard Research (ISR). ISR administered a quality benchmarking survey to respondents from biotech and pharmaceutical companies who worked with contract manufacturing organizations on an outsourced project within the past 18 months. This level of qualification ensured that survey responses were based on authentic involvement with contract manufacturers and precise experiential data. The respondents were asked to assess the performance of 86 contract manufacturing organizations by providing answers to 45 questions across 23 performance attributes. Points were then totaled for a combined score for each attribute, and a composite score for each category was determined. Winners were identified by comparing their overall score with the competitive set.

About the Awards:
The CMO Leadership Awards recognize top outsourcing partners, determined by feedback from biotech and pharmaceutical companies who outsource manufacturing. The awards are presented by Life Science Leader, Outsourced Pharma and Industry Standard Research. Life Science Leader is a business journal for executives in emerging biotech and pharmaceutical industries. Outsourced Pharma provides comprehensive analysis and exclusive content from thought leaders for the advancement of global outsourcing of drug development and manufacturing. Industry Standard Research is the premier, full-service market research provider to the pharma and pharma services industries.
